Bestway

30th ANNIVERSARY
1994 — 2024

Three decades ago, Bestway created its very first product: a beach ball!

Since then, Bestway has produced over **1,100 products** in more than **120 countries** worldwide. In fact, 1 in 50 people around the world owns a Bestway product.

From our commitment to **innovation** and assuring the highest **quality** possible, to our vertically integrated manufacturing systems and **sustainability** efforts, every product Bestway creates centers on one goal: to help our customers get the most out of life by enjoying more adventure and making more memories.

Here's to the first 30 years, and to many, many more as we help people "**Live It Up!**"

OUR VISION & MISSION

Our Vision has remained the same since we created our very first product – a simple beach ball – in 1994: to create high-quality, innovative, recreational products that bring fun, relaxation and adventure to people's lives. Behind that vision is our mission to create memorable experiences for families who want to splash into summer, relax in winter and make the most of every moment year-round.

Now over 30 years later, **Bestway** has forged a global presence in more than 120 countries by developing over 1,100 products and becoming forward-thinkers about sustainable business practices.

SERVICE

Bestway is committed to customer satisfaction and providing you with the best product solutions. Our advanced online services and customer service team allow customers to easily resolve issues that arise with their products, offer downloadable manuals and instructional videos, answers to their frequently asked questions and call support.

WHAT'S NEW AT BESTWAY

In 2020, Bestway opened our doors to a **new, clean, state-of-the-art manufacturing facility in Vietnam** in an effort to diversify our production capabilities globally. With rapid plans for expansion, this new facility offers additional tariff-saving opportunities and flexibility in Bestway's global manufacturing efforts.

Our Vietnam facility currently manufactures air mattresses, air pumps, pool filter pumps, inflatable pools, pool covers and trampolines. These products go through extensive PVC, lab and lifecycle testing to ensure high-quality and longevity.

PRODUCT TECHNOLOGY

THE ORIGINAL PREMIUM PORTABLE SPA™

As a leading manufacturer of the inflatable, portable hot tub, Lay-Z-Spa® has become an industry staple that consumers know and trust. From technological innovations to style, Lay-Z-Spa leads the market. High-functioning components and safety are the main priorities of the hot tub line, providing consumers with products they can depend on.

FREEZE SHIELD® TECHNOLOGY

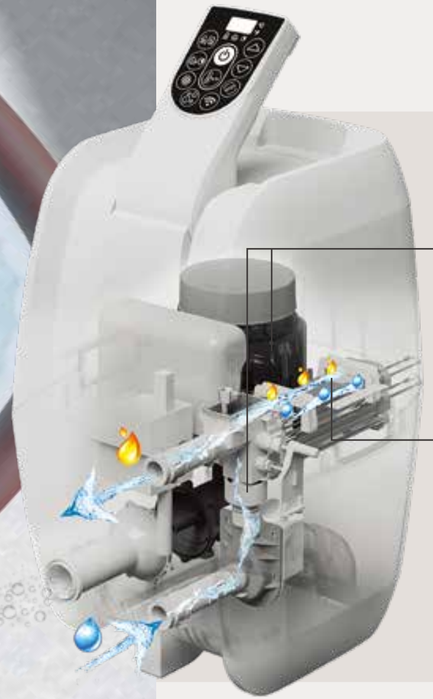
COMFORT IN THE COLD

Freeze Shield® successfully equips the hot tub for year-round, all-weather use. Designed with innovative winterizing technology and an improved material, these hot tubs automatically increase water circulation and heating when temperatures are low to prevent the inner parts from damage.

INCREASED ENERGY EFFICIENCY

HIGH HEAT RETENTION, LOW ELECTRIC BILL

The EnergySense® thermal covers and liners retain more heat than PVC material alone. This allows the hot tub to heat up faster and stay hotter longer, leading to as much as 40-60% higher energy-efficiency.



HIGH-TECH COMPONENTS AND DECREASED NOISE

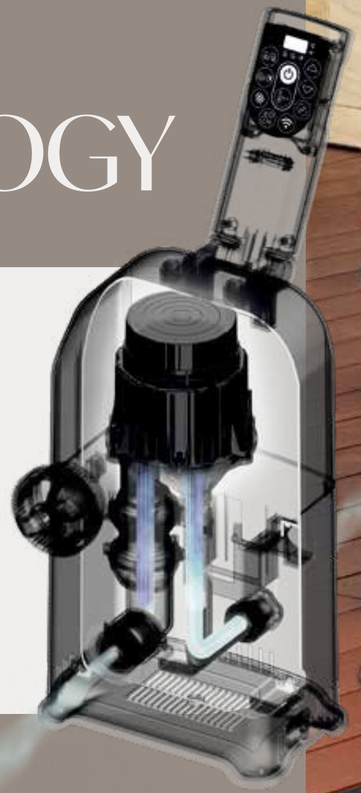
EFFICIENT • DURABLE • SAFE

The internal pump components are designed to work efficiently, while reducing the noise level as much as possible during use. Engineered with a rotor and blade, our pumps are specifically designed to have a soft internal connection, reducing the noise.

ADVANCED HEATING SYSTEM

By using advanced materials to create our heating mechanism, we ensure efficient temperature control. The internal structure is protected by six layers of insulation to prevent electrical damage.

PUMP TECHNOLOGY



Every Lay-Z-Spa hot tub set comes with a multi-function pump that inflates the hot tub, heats the water and runs the filtration system. Each hot tub is assembled using the pump, no additional tools required!

ULTRAFIT™ PUMP

SPACE-SAVING SOLUTION

Some of our AirJet™ hot tub sets feature the UltraFit pump – a multi-function pump that is built directly into the liner. With all of the same functions as our standard pump, the UltraFit version saves valuable backyard space, expedites the installation process, and looks sleek and modern.

MASSAGE TECHNOLOGY

AIRJET™ SYSTEM

Soothe your body and relax your mind with the touch of a button! The AirJets work by releasing air into the water, surrounding you with a calming bubble massage.

HYDROJET™ SYSTEM

Enjoy a deeper massage with the HydroJet System! Along with the bubble massage, there are a few adjustable nozzles next to the pump that release a more targeted massage.

HYDROJET PRO™ SYSTEM

HydroJet Pro is the best of both worlds! Adjustable nozzles along the inside walls of the hot tub release soothing jetstreams of water, while jets along the bottom release a calming flow of air bubbles specifically targeting your feet and back.

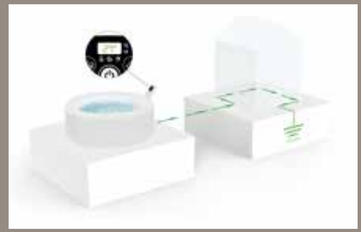
PRODUCT SAFETY

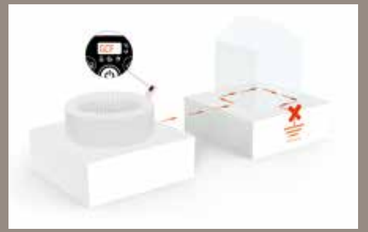
Safety is our top priority when designing and producing our inflatable hot tubs. We are consistently upgrading our products to ensure that consumer safety is never compromised. Currently, Lay-Z-Spa is the only brand on the market that uses this exclusive GDS & GLEDS technology.

GDS

GROUND DETECTION SYSTEM

With safety as a priority, every hot tub is equipped with our advanced, market-leading Ground Detection System, which monitors the energy supply to ensure it is being used safely. If the system detects an issue, the pump alerts the user and does not allow further use until the power supply is correctly earthed.

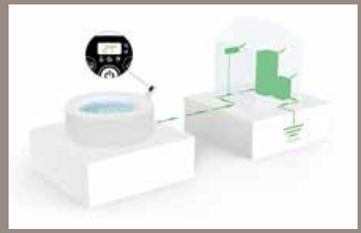




GLEDS

GROUND LINE ELECTRIC DETECTION SYSTEM

Once the hot tub is plugged in, the system continuously monitors the ground of the electrical system in the house and will advise the user with the E18 code if there is other electricity detected.



MATERIAL TECHNOLOGY

PVC CONSTRUCTION

ESSENTIAL STRENGTH AND COMFORT

The internal construction of these hot tubs is designed to offer superior structural stability while still maintaining a comfortable surface.

MAXHOLD™ CONSTRUCTION

PREMIUM AIR RETENTION

MaxHold™ fabric internal beams prevent stretching and air loss, ensuring the hot tub consistently maintains its shape even with repeated inflation and deflation.

THERMACORE™ CONSTRUCTION

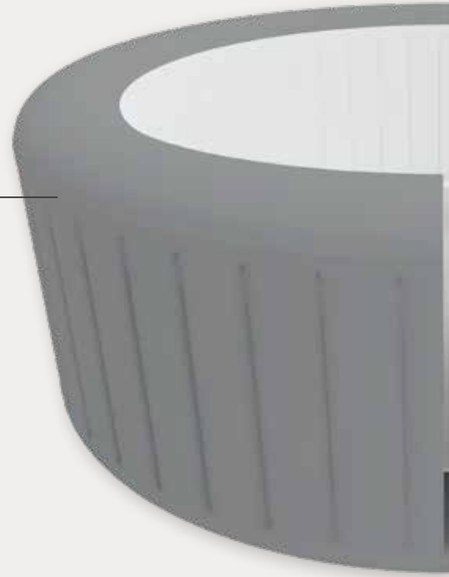
EXCEPTIONAL STABILITY

ThermaCore™ foam construction creates a rigid, firm structure that is exceptionally sturdy and stable. Plus, with built-in foam insulation, it is up to 60% more energy-efficient than its inflatable counterparts.

TRITECH® MATERIAL

3-LAYER STRENGTH

This exclusive formula of mesh encased in PVC offers three layers of puncture, abrasion and stretch resistance to protect the hot tub.



NEW HOT TUB NAMING CONVENTIONS

For streamlined alignment within the hot tub category, we updated the naming conventions to be determined by 4 major factors.

1. FAMILY GROUPS

The official name will be a city determined by the construction and external liner design:

	PVC BEAMS	MAXHOLD™ BEAMS	THERMACORE™
PLAIN	Miami	Hawaii	—
WOODEN	Helsinki	—	Toronto
WICKER	Fiji	Bali	—
MARBLE	Athens	Rome	Carrara
SEMI-TRANSPARENT	Hollywood	—	—

2. SPECIAL FEATURE*

A pre-defined descriptor is added to the name based on the following hierarchy:

SPECIAL FEATURE	Smart	Luxe
MEANING	Wi-Fi integration	LED lights

*If more than one special feature is present on the product, the item will take the name of the highest-ranking feature in the hierarchy.

3. MASSAGE SYSTEM

The name of the massage system is added after the special feature (if applicable):

MASSAGE SYSTEM	AirJet™	HydroJet™	HydroJet Pro™

4. USER CAPACITY

The max user capacity of the hot tub is added to the end of the name:

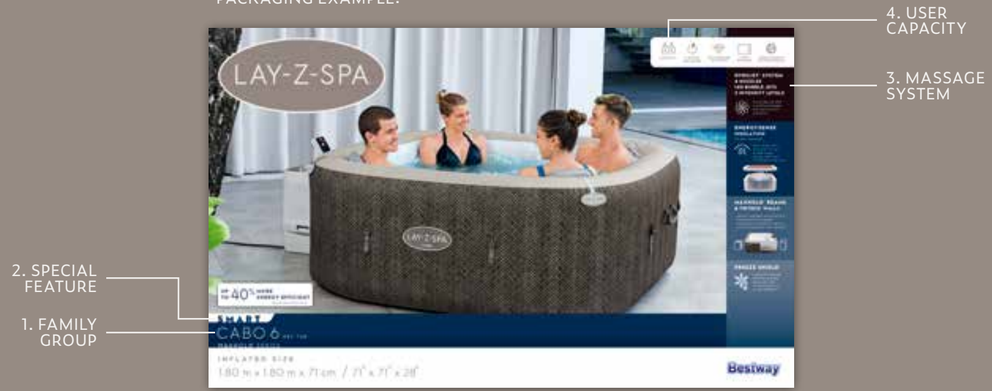
NUMBER	4	6	7
USER CAPACITY RANGE	2-4 Adults	4-6 Adults	5-7 Adults

IMPLEMENTATION

All existing products will be updated to include the Special Feature and User Capacity, but they will keep the existing city name.
All new products beginning in the 2025 season will follow the new convention system outlined here.

Some naming conventions may apply to Special Edition hot tubs only.

PACKAGING EXAMPLE:



SMARTPHONE APP CONTROL

HEAT CONTROL

Create, save and edit multiple timers to apply the perfect temperature anytime throughout the week

SET TIMER

Set the Power Saving Timer to only run the system during the selected times

FILTRATION

Allows for multiple timers to be created for water filter activation

MASSAGE SETTINGS

Run the massage system with the touch of a button

APP CONNECTION

DELIVERING CONVENIENCE AND COMFORT

With the Bestway smartphone app, control is right in the palm of your hand. This innovation makes the Lay-Z-Spa one of the most convenient in the market. Compatible with smart devices, the Hot Tub Control section of the app lets you control the hot tub's temperature, run the filtration system, and control the massage system with just the touch of a button! Plus, you can even set a timer for the temperature and filtration systems.

SETUP & MAINTENANCE

WITH THE KEY TOOLS ALREADY INCLUDED, LAY-Z-SPA SETUP IS QUICK & EASY!

AFTER FINDING A FLAT AREA FOR THE HOT TUB, IT'S AS EASY AS 1, 2, 3!

1. ASSEMBLE the hot tub, inflating and connecting the pump if necessary.
2. FILL the hot tub with water to the indicated level.
3. ENJOY the relaxing massage!

Also included with each hot tub is a chemical dispenser and filter cartridge to keep the water sparkling. Maintaining clean and healthy hot tub water is important for the user's experience, and also extends the longevity of the hot tub.

For quick and easy transportation and storage, each hot tub is equipped with a deflation function.
